REPORTING ON EXPORTED PATIENTS IN ACCURO

A list of all SK CDM QIP Worksheets that have been exported can be viewed on the QIP CDM Worksheet Activity window.

Note: The QIP CDM Worksheet Activity window should be reviewed **regularly** to verify exports were sent successfully.

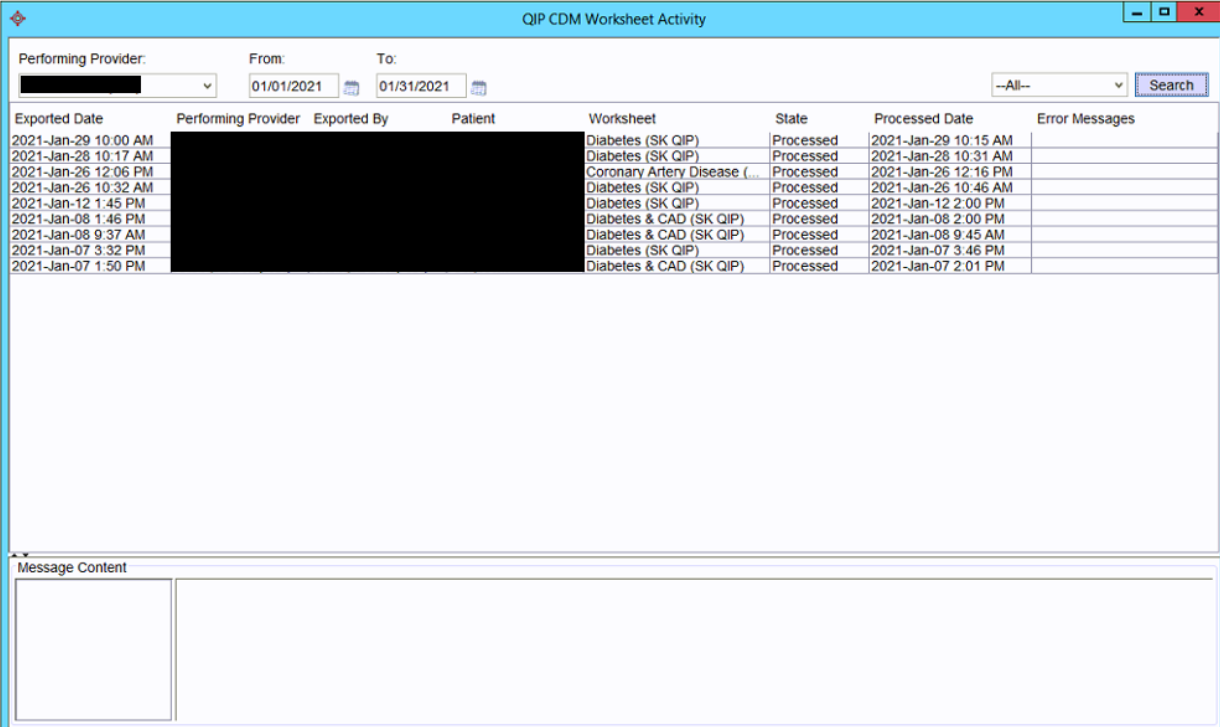

How To Access Window

1. Select QIP CDM Worksheet Export Activity under the Reports menu item.
2. Click the Search button to display the export records.

The Performing Provider dropdown allows you to filter the export records by provider and will default to –All–. This will display the export records for all providers the user has access to.

The From and To date fields allow you to filter the export records by the exported date.

The dropdown next to the Search button allows you to filter the export records by State. A state of Processed means the export was received by eHealth Saskatchewan.

The screenshot shows the 'QIP CDM Worksheet Activity' window. At the top, there are filters for 'Performing Provider' (a dropdown menu), 'From' (01/01/2021), 'To' (01/31/2021), and a 'State' dropdown menu set to '--All--'. A 'Search' button is located to the right of the State dropdown. Below the filters is a table with the following columns: Exported Date, Performing Provider, Exported By, Patient, Worksheet, State, Processed Date, and Error Messages. The table contains 10 rows of data, all with a 'Processed' state. Below the table is a 'Message Content' section with a text area.
